## *I Provide Buyers a Review for the Finis SwiMP3 128 MB MP3 Player*

The Finis SwiMP3 128 MB MP3 Player is a revolutionary device made exclusively for swimmers who want to listen to music while swimming without the music becoming distorted or the device shorting out from water damage. The Finis SwiMP3 128 MB MP3 Player is designed much differently as it consists of two ear bud devices that go into

your ears, and [storage](#) is only sufficient enough to store 32 MP3 file songs. Nevertheless if you are a competitive swimmer who would like to listen to music during [workout](#) sessions the Finis SwiMP3 128 MB MP3 Player is a one of a kind device that makes listening to music during swimming a reality with advanced [technology](#) to create exceptional sound quality like you've never heard before, at a price that's affordable enough for even the casual swimmer.

### Product Rating:

Sound: 8.5/10 Stars

Ease of Use: 8.5/10 Stars

Durability: 9.5/10 Stars

Portability: 8.5/10 Stars

Battery Life: 9.5/10 Stars

### Main Product Features:

The Finis SwiMP3 128 MB MP3 Player is small in terms of [storage](#) space, but the device really shines in terms of technology. The Finis SwiMP3 128 MB MP3 Player uses a new [technology](#) called bone conduction to transfer the sound directly through the swimmers check bones, which creates a crystal clear audio reception unlike any others. This [technology](#) is what separates the Finis SwiMP3 128 MB MP3 Player from other devices, which only deliver muffled sound to the swimmer. The [storage](#) space isn't very large, as you can only store 32 [songs](#) in the MP3 file format, but the sound quality is exceptional enough to make up for the short comings.
